Mileage

Last Reported Mileage	SAMPLE	Estimated Mileage	SAMPLE
------------------------------	--------	--------------------------	--------

Mileage Source	SAMPLE	Odometer Status	SAMPLE
Note: On a real report, estimated mileage reflects the most recent odometer reading on file, it is not necessarily the vehicle's current mileage. In this sample, every value reads SAMPLE.			

Title Records

SAMPLE. On a real report, this panel lists every title record found for the vehicle, the issuing authority, the title date, and any brand applied (such as salvage, junk, flood, or rebuilt).

Accident and Total Loss

SAMPLE. This panel shows accidents reported to relevant authorities, and any point where an insurer declared the vehicle a total loss, even if the title itself was never branded salvage or junk.

Junk and Salvage Records

SAMPLE. Filings from insurers, salvage yards, and auto recyclers appear here, including vehicles sold for parts or scrapped, with the reporting entity and the date of the filing.

Odometer Check

SAMPLE. Mileage readings recorded at each title transfer are compared here, so a reading that drops or jumps unexpectedly is easy to spot.

Title Brand Checks

Every VIN is screened against a wide list of known title-brand problems. A sample of that list:

Title Brand	Result	Reporting Authority	Date Applied
Flood Damage	SAMPLE	SAMPLE	SAMPLE
Fire Damage	SAMPLE	SAMPLE	SAMPLE
Hail Damage	SAMPLE	SAMPLE	SAMPLE

Odometer Not Actual	SAMPLE	SAMPLE	SAMPLE
Salt Water Damage	SAMPLE	SAMPLE	SAMPLE

Title Brand Checks (continued)

The full report runs a longer list of checks than shown on the previous page. If a brand has ever been applied, it appears here; if nothing has ever been reported, the report states that too.

About This Sample

This document is published by Vehicle Records Check to show prospective customers the structure, section order, and depth of a full vehicle history report before they order one. It is not a record of any real vehicle, every field above reads SAMPLE.

A live report is generated only after a valid VIN is submitted, using data from title and brand databases, insurance and salvage filings, manufacturer recall notices, and published specification data. A vehicle history report reflects what has been reported to those sources, it is not a guarantee against undisclosed damage, and we recommend pairing it with your own inspection of the vehicle before you buy.

Vehicle Records Check does not guarantee the accuracy, availability, or completeness of information supplied by third-party sources, and information may change after the date a report is generated.
